

XB-II Series ICE Maker

The automatic snowflake ice machine is a new generation of snowflake ice machine. According to the ice requirements of the industry, high-efficiency fluorine-free imported compressors are adopted, mechanical rotary extrusion ice-making methods, computer-controlled automatic ice-making, and the ice-making type is irregular fine-grained snowflake crushed ice.

Features

- 1. Fast ice production: 5 minutes to quickly produce ice, with small crushed ice particles and low water content.
- 2. Environmental protection and energy saving: imported compressors are used, which are environmentally friendly, fast in cooling and long in life.
- 3. Fault self-diagnosis: one-button start, fault self-diagnosis.
- 4. Humanized design: original water purifier, pure ice making and anti-dirt.
- 5. Automatic drainage: bid farewell to the trouble of no floor drain and realize high-level drainage.
- 6. Capacity upgrade: truly large-capacity ice storage to meet various needs.

Parameters

Model	Ice production capacity (kg/24h)	Ice storage capacity (kg)	Input Power (W)	Refrigerant	Product Dimensions (L*W*H mm)
XB-20II	20	15	240	R134a/80g	420*580*735
XB-30II	30	15	240	R134a/80g	420*580*735
XB-40II	40	15	240	R134a/80g	420*580*735
XB-50II	50	15	240	R134a/80g	420*580*735
XB-70II	70	25	420	R404a/120g	600*600*830
XB-85II	85	25	420	R404a/120g	600*600*830
XB-130II	130	32	600	R404a/160g	600*700*830
XB-150II	150	32	600	R404a/160g	600*700*830
